

Summary of Proposed Regulation Changes

KAR 129-14-22

For children applying for presumptive eligibility for HealthWave, this regulation states that the qualified entity, not the Medicaid agency, will send out the notice of action.

The regulation also states that if the qualified entity denies eligibility, there is no right to a fair hearing of that decision, the child must then apply at the local office or clearinghouse for a regular eligibility determination.

KAR 129-6-38

This regulation is the same as the one above except for Medicaid and not HealthWave.

KAR 129-5-1

This regulation requires prior authorization of pharmaceutical products and the following drugs are being added:

Zonegran, gabitril, Antara and Lofibra.

The following drugs are being removed and will no longer require prior authorization:

Quinapril, all cyclooxygenase 2 inhibitors, diclofenac misoprostol, cetirizine and eletriptan HBr.

KAR 30-14-22

This regulation is being revoked and amended with the new agency number (KAR 129-14-22).

KAR 30-6-38

This regulation is being revoked and amended with the new agency number (KAR 129-6-38).
